## 👤 EXPERIENCE

**TeamViewer**, Göppingen, Germany 10/2020 – 05/2021

*Software Engineer (Part-Time) | Software Engineer Intern (Until 01/2021)*

- Implemented the instructions screen, QR code scanner, connection screen, and Google Analytics events for the *2FA for connections* feature on the TeamViewer for [Remote Control](#) Android app.
- Developed the *EULA* feature library used by TeamViewer for [Remote Control](#), [QuickSupport](#), and [Pilot](#) Android apps, impacting more than 60 million users.
- Built TeamViewer and CyberArk REST API pipelines for automated Android UI tests.
- Utilized: Kotlin, Java, C++, Android SDK, MVVM, Coroutines, LiveData, Volley, UI Automator, JUnit.

**Twenty Billion Neurons (Acquired by Qualcomm)**, Berlin, Germany 06/2020 – 09/2020

*Software Engineer Intern*

- Delivered six significant features to the deep learning powered fitness app [Fitness Ally](#) by working primarily in the R&D Python team and voluntarily in the iOS team with 10k+ SLOC.
- Built a Python CLI changelog generator that resolved the changelog conflict issue.
- Utilized: Python, Swift, Objective-C, iOS SDK, Pytest.

**Jacobs University Bremen**, Bremen, Germany 09/2019 – 05/2020

*Teaching Assistant*

- Graded homework and gave tutorials for Algorithms & Data Structures, Intro to CS, and Data Management.
- Utilized: Python, Java, C++, C, Haskell, MySQL, GCP.

**TD Tech**, Beijing, China 06/2019 – 08/2019

*Software Engineer Intern*

- Delivered three significant features to two enterprise Android apps on top of the AOSP with 8k+ SLOC.
- Utilized: Java, Python, Android SDK, SQLite.

## 🎓 EDUCATION

**Jacobs University Bremen**, Bremen, Germany 08/2018 – 06/2021

*B.S. Computer Science*

- ML, Algorithms & Data Structures, C & C++, OS, DB, Statistical Modeling, Software Engineering.
- Thesis on Deep Learning for Object Detection with TensorFlow.

## ⚙️ PROJECTS

- **JStore: Marketplace for Jacobs University Bremen - Native Android & iOS Apps**
  - 7k+ SLOC. 1k+ users. Available on [Google Play](#) & [App Store](#). GitHub repos: [Android](#) & [iOS](#).
  - Utilized: Java, Swift, Android SDK, iOS SDK, Firebase (Auth, Cloud Firestore, Storage).

## 💻 SKILLS

- Python, Kotlin, Java, Swift, C++, Dart, C, SQL, Go, JavaScript, HTML/CSS, Haskell.
- Android SDK, iOS SDK, Flutter, TensorFlow, Git, Firebase, Django, Spring, GCP, Docker.
